

POTTER SUBMITS HIS FIRST REPORT

Says Big Expenditure May be Saved on Sewerage—River Water is Satisfactory.

Alexander Potter, of New York, who has been engaged by the city to report on the sewerage and water improvements for the city of Edmonton, has submitted to the commissioners a preliminary report after a personal examination which he has made extending over the past two weeks.

In connection with the sewerage and drainage the city engineer, Mr. LaTourette, had asked him to give attention to two things principally:—

First—to pass upon the plans of work contemplated for immediate construction.

Second—to project a general scheme of sewerage and drainage as well as sewage disposal for the whole city which could be carried out from year to year as the demands of the city warrant.

The Water Supply.

With reference to the water supply, the engineer has asked him to make a general examination of the water situation in the following manner:

First—to plan such additions and improvements to the present water plant that will be sufficient to meet all requirements of the city during such a period as the present plant is necessary to examine into, plan and carry out execution of permanent supply for the city.

Second—to examine generally into the available sources of water supply for Edmonton so that in the event of any necessary crisis the city might be able to turn to any one of the sources, abandoning the present site, directions can be given to the city engineer to select such upon which to erect a new system.

Mr. Potter takes these questions up one after another and handles them fully with the data that he has before him.

Big Expenditure Unnecessary.

Dealing with the work contemplated by the engineer for immediate construction the expert says:—

"Conventional sewerage disposal have no changed since your engineer made his recommendation on the sewerage of which the city has utilized the expenditure of \$200,000 for a long gutt sewer and a sewer for sewage disposal works, that the construction of this sewer is, in my opinion, unnecessary."

"In my opinion there is available sufficient land near the mouth of the proposed new cutting for the disposal of the sewage of practically the entire city in a manner that will make the effluent comply with the municipal health act. If the experimental plant can be built at a reasonable cost, the expectation of its designer, R. B. Owens, provincial sanitary engineer, even a high standard of health will be obtained at a moderate cost."

The consent of the city council and provincial board of health has been secured to the modification of the plan herein referred to, and the expenditure to the city of over \$100,000.

The city engineer is making deep borings along the line of the new sewer. It will be built in tunnel and can therefore be constructed during the winter with equal facility, thus affording employment for the men on each employment is most needed."

"With regard to the general sewerage and drainage project for the city Mr. Potter says he has had access to all the data now secured and the engineer is now engaged in securing more data, after which it will be possible to proceed with the design of general sewerage, drainage and sewage disposal."

Additions to Water Supply.

Taking up the questions of additions and improvements to the present plant, Mr. Potter says that the problem of a permanent water supply for the city of Edmonton is, at present, in too much of a transition state and the data required for a reliable, possible source of supply too vague, so that it is better to leave the near future as to where the permanent water supply should be secured."

"Additions must," he says, "be made in the present plant to meet the growing demands of the city and I will prepare plans for the additions of the various elements in the present plant to insure a proper and safe supply."

Remaining at the present site, extending, if necessary the intake to the river.

Building an entirely new pumping station at some favorable point higher up the river.

Obtaining a gravity supply from Pigeon lake.

Each of these schemes, he says, has its merits and demerits and data not now available must be secured before it is possible to reach a conclusion as to which is the best. Continuing, he says:—

River Water Will Do.

"It is no doubt," he says, "that the Saskatchewan river either is, or can be made at all times a suitable

and sufficient water supply for Edmonton for all time. The water of the Saskatchewan, however, needs treatment at least a portion of the time. Data is being collected that will show the cost of this treatment of treating the water. The sewerage and drainage of Edmonton and Strathcona will have an influence on the problem."

"Discussing Pigeon Lake, there are many conflicting opinions as to its volume, quality and cost of construction. Upon one of these points have we any reliable data."

Should Investigate Pigeon Lake.

"After a three-day trip to Pigeon lake and vicinity, I am fully convinced that it is a project worthy of investigation and consideration, as a future source of Edmonton's water supply. At the time of my visit it was a most attractive and apparently pure body of water. The percentage of water so gravely soiled is much greater than I anticipated."

"It is just such a body of water that might easily come to span the city. But I would be loath to make any suggestion of its adoption until the city has had the opportunity to make a full investigation of its physical and chemical qualities of the water near its source."

"The water of Pigeon Lake, however, or in some years, the water is said to have certain mineral qualities. The owner of one of the saw mills on the lake informed me that the water is used for the purpose of growing vegetables, that is, not only over the surface of the water, but also in the water itself. The city must have first-hand information in all such cases before it ventures on covering a series of years."

Location for Plant.

"Deciding on the location for a plant on the river is also a task of no small importance. In my opinion, the present plant should be supplemented by subsequent machinery to move the water to the city for a period of at least five years. The city must have first-hand information in all such cases before it ventures on covering a series of years."

PROVINCIAL OFFICIALS MUST BE RE-SWORN

EXAMINATIONS FOR STANDARDS V & VI

Departmental Exams Will Be Held On Last Four Days of June Throughout Province.

The departmental examinations for standards V and VI will be held this year on June 20th, 21st, 22nd and 23rd. The examinations in these two standards will be conducted at the same centers, during the same days, and under the same presiding examiners.

The department will supply the required paper and ink, but the candidates are advised to provide themselves with rulers, compasses, penholders, etc. Forms of application and copies of time tables will be mailed on request.

The department will endeavor as far as possible to have the candidates for each school at the most convenient center, and each teacher is available. The relative exposure and daily run-off should be observed for a number of days before the physical and chemical qualities of the water near its source."

KING EDWARD'S LIFE INSURED FOR \$1,200,000

London, May 10.—With the assembling of King George's life insurance board that he decided the show to be held as arranged.

The insurance companies have been payment of the \$1,200,000 in policies carried on King Edward's life. Many of the premiums were as high as sixty per cent.

Today King George added to his rapidly growing popularity by notifying the international press that he had decided the show to be held as arranged.

PIRATES STILL ON THE CANTON

Lieut. Roberts, R.N.R. Tells of Conditions in British Colony of Hong Kong.

A visitor from the Orient, Lieut. Cyril G. Roberts, R.N.R., is in Edmonton today, a guest at the King Edward Hotel. Lieut. Roberts is on his way to England on six months leave of absence from Hong Kong, the British Crown Colony in the East.

Coming direct from China, Lieut. Roberts speaks enthusiastically of his first-hand knowledge of present conditions on the Asiatic coast, particularly in the Canton with its population of over a million natives.

Hong Kong, an island near the mainland of China, was ceded to Great Britain in 1842, with Kowloon and the New Territories, ceded in 1861, it forms a British Colony in the center of a large trade, the Chinese silk and tea trade being largely through Hong Kong. Recently the island has become the scene of a great deal of business, and investment of millions of capital by British and other building companies.

Piracy at Hong Kong.

"The Canton river," says Lieut. Roberts, in conversation with the Bulletin this morning, "is a busy waterway, and is patrolled by British gun boats. The boats are small, but they are a formidable force, and they are a great help in the river."

"The boats are small, but they are a formidable force, and they are a great help in the river."

TRI-COLOR FLIES AT HALF MAST

French May Day Striking Tributes to the Dead.

Paris, May 10.—The Minister of Marine has ordered that all ships of the French navy carry their flags at half mast until after the funeral King Edward.

Tokyo, Japan, May 10.—The International Press Association in Japan has adopted a resolution expressing its profound sense of the loss to the world, especially to Japan, through the death of His Majesty King Edward, the Peace maker of the nation. The city is in deep mourning. The electric cars are flying the Union Jack and the Japanese flag at half mast.

Similar displays are made from buildings in the principal cities.

France Lost a Friend.

Paris, May 10.—News from Europe has carried the early story to the French people, which has been expressed more emotion than in France where it was gradually accepted as the principal action in the present diplomatic combination for the preservation of the present peace.

French government intends to express its sympathy to the Emperor.

Premier Briand and others of the cabinet personally called upon King Edward, and they will go to the funeral in London.

The Emperor's death has been a great loss to the world, and it is a great loss to the French people.

QUEBEC TAKES UP ON PRINT PAPER

Treasury Department Decides to Repeal the Prohibition on Exports of Pulpwood.

Washington, D.C., May 10.—To meet the conditions imposed by May 1st by the Province of Quebec on exports of pulpwood, the treasury department has made a decision regarding the counter-vailing duty of 40 cents a ton on print paper from both provinces and from the Crown lands in that province.

Quebec was the one Canadian province which imposed an export tax of 40 cents a ton on pulpwood from the Crown lands.

The recent action of the province in prohibiting exports of pulpwood naturally attracted the attention of the treasury department, which has now decided to repeal the export tax of 40 cents a ton on print paper and leaves pulpwood and pulp in print paper in the same situation in Quebec as in the other provinces.

The decision, which also prohibits the export of pulpwood.

This decision means also in effect that the province of Quebec will be made a decision regarding the counter-vailing duty of 40 cents a ton on print paper from both provinces and from the Crown lands in that province.

RAIL

MISSIONARY SOCIETY MADE PROGRESS

McDougal Women's Missionary Society held Annual Meeting and Election of Officers at the home of Mrs. J. H. McDougal, last night.

The annual meeting of McDougal Women's Missionary Society was held on Tuesday, April 26th, at the home of Mrs. J. H. McDougal, last night. During the year a marked increase along all lines was noticeable and increased enthusiasm in the membership. Several of the members were lost through removal, and by the organization of an auxiliary in Wesley church. Yet the membership has increased from 124 to 156 members, composed of 120 annual members, 23 life members. The credits roll has 78 members, and the mission fund 23 members, and the mission credit 23 members.

The meetings are held the fourth Tuesday of the month at the home of the members. During the year 1909-10, 5 special, 3 executive and 3 public meetings have been held. In July the meeting took the form of a basket picnic at the home of Mrs. Armstrong, Jasper Place, and in August a social at the home of Mrs. Hardisty, Jasper Place, on Fifth Street.

The third week of June was observed as Crusade Week, and on Wednesday evening the reports of the delegates to the branch at Moose Jaw were received. In November the program, at the home of Mrs. J. H. McDougal, was given a report of the mission of the annual meeting, held at Hamilton, Ontario. Another interesting meeting was held in April in charge of the mission of the year, at which the mission was given. Life membership certificates were given to the three new life members.

The credit roll members, and their families were entertained at a social at the home of Mrs. J. H. McDougal, last night. The auxiliary also assisted the mission of the year, and home-made cooking sale held in the hall of the church in March.

The report was given by the mission of the year, and the mission was given. Life membership certificates were given to the three new life members.

The monthly meetings were found very interesting. The study of the year's work was taken up. The mission of the year was given. Life membership certificates were given to the three new life members.

INNISFAIR'S NEW COUNCIL IN SESSION

Committee Appointed to Consider the Education for the Chinese. The Chinese are being educated on Sunday—Others From This Quelling Town.

Innisfair, May 2.—At the last meeting of the town council, Councillor McFar, with the mayor and assessor, were appointed the education committee. The motion being carried, all the members of the council were invited to attend at the next committee meeting on Sunday.

Councillor Kemp reported a complaint by W. Miller that the Chinese were selling goods on Sunday and he was not allowed to do so. On motion of the council, the license and police committee were instructed to interview the Chinese and inform them that they must not sell fruit, tobacco or any other goods on Sunday.

Only one application for a license to sell goods on Sunday was received. Only one, so far, is from a Chinese. The application is in for the secretary.

F. M. Copland will begin operations at his horse factory, the Big Bend district at once. He is assisted by John Duncan. He has a pair of horses to bedeck.

John Duncan has shipped a cart of horses to Bedgewick. He has a pair of horses to bedeck.

Mr. and Mrs. Percy Goulet, late of the hardware store, are in town for a few days, having spent the winter in the States.

C. B. McCallum, late of McCallum & Watt Brothers, has purchased a house in the city.

The public school team played a football match against the Little Red team, but the locals were too strong, defeating them by a score of 10 to 0.

Mr. Robertson, of Olds, and late of Innisfair, paid a visit in his new auto.

P. O'Brien's new house was the celebration of a pleasant evening, consisting of dancing, music and games, and was a great success, as he is popular with the most popular man in the district.

J. K. McMillan is having a successful business at Olds. He is leaving for some new town in the west.

The Ladies' Aid of the Presbyterian church held a home cooking sale, at Mrs. Westland's. Everything was sold for 25 cents.

The old schoolhouse, recently filled with a dancing, has been moved to D. H. Kromer's brickyard.

George Handford, of Three Hills, is in the hospital. He was first at Vancouver, at the age of 85. He came to Innisfair, and then to Three Hills, and then to the hospital.

A very poor attendance of the first bridge turned out on Thursday evening, only some five members being present.

AROUND THE CITY

LOCAL.

The Edmonton Irish Association will hold its regular meeting on Wednesday, May 11, at 8 o'clock, at the home of Mr. J. C. Corbin, of London, Ont., a retired farmer. It is the city's oldest association. The association is held in the most important ever held in the province. The association is held in the most important ever held in the province.

WHERE THE COAL IS.

How many residents of Alberta know where the province's supplies of coal are located? Most people are aware that there is quite a lot of coal in Alberta, and it is located in a good deal in the neighborhood of the city. The principal coal deposits are in the southern part of the province.

Estimated estimate of the Department of Mines of Canada shows that the total coal reserves in the province are 50,000,000 tons. The estimated coal reserves of the Edmonton formation are 10,000,000 tons.

DAILY STORE NEWS

W. JOHNSTONE WALKER & CO.

SOMETHING NEW. That is the eternal cry of humanity, or, at least, of civilization. Shoe makers for ladies are specially called upon to provide this something new every year. Of all those engaged in the work none are better qualified to give satisfaction in the matter of individual tastes than the renowned Dorothy Dodd firm.

5235. NEW BLACK SUEDE PUMPS. These are made with the new short vamp. They also have bow and ankle strap, extension welt sole and are very dressy and smart. We show them in sizes 1 to 7. Per pair \$4.50.

1621. NEW PATENT PUMP. A special combination of the strap and heel, which gives them a distinctly up-to-date appearance. Cuban heels and welt soles complete another distinct success from this famous factory. Sizes 1 to 7. Per pair \$4.50.

1490. NEW PATENT OXFORDS. Cut on the Blucher plan, these have suede facings and turn sole; heels are medium height and the whole gives an easy wear and stylish footwear. Sizes 2 to 7. Per pair \$4.50.

3613. NEW SWISS CALF. A smart innovation of the Oxford type. Fastens with 4 buttons and made of new Swiss calf, which takes a very high polish. The buttons are of pearl. Sizes 2 to 7. Per pair \$5.00.

638. NEW ECLIPSE TIE. Of the new coffee calf with bow and ankle strap, welt sole. This is absolutely new and quite smart. Sizes 1 to 7. Per pair \$4.50.

1720. NEW PATENT TIE. Made with the Cuban heel. All patent; fastens with 4 eyes and built on a new Dorothy Dodd Model. May be had with or without cut. Sizes 1 to 7. Per pair \$5.00.

Ontario Newspaper Man Dead.

Kington, Ont. May 9.—Saturday afternoon E. J. J. Pense, proprietor of the Windsor newspaper, was stricken with apoplexy in his garden, and died soon after. He was aged 61. In 1872 he succeeded his grandfather as proprietor of the Windsor, conducting it with great ability. He was an Anglican. A wife, one son and four daughters survive him.
